# KAPI

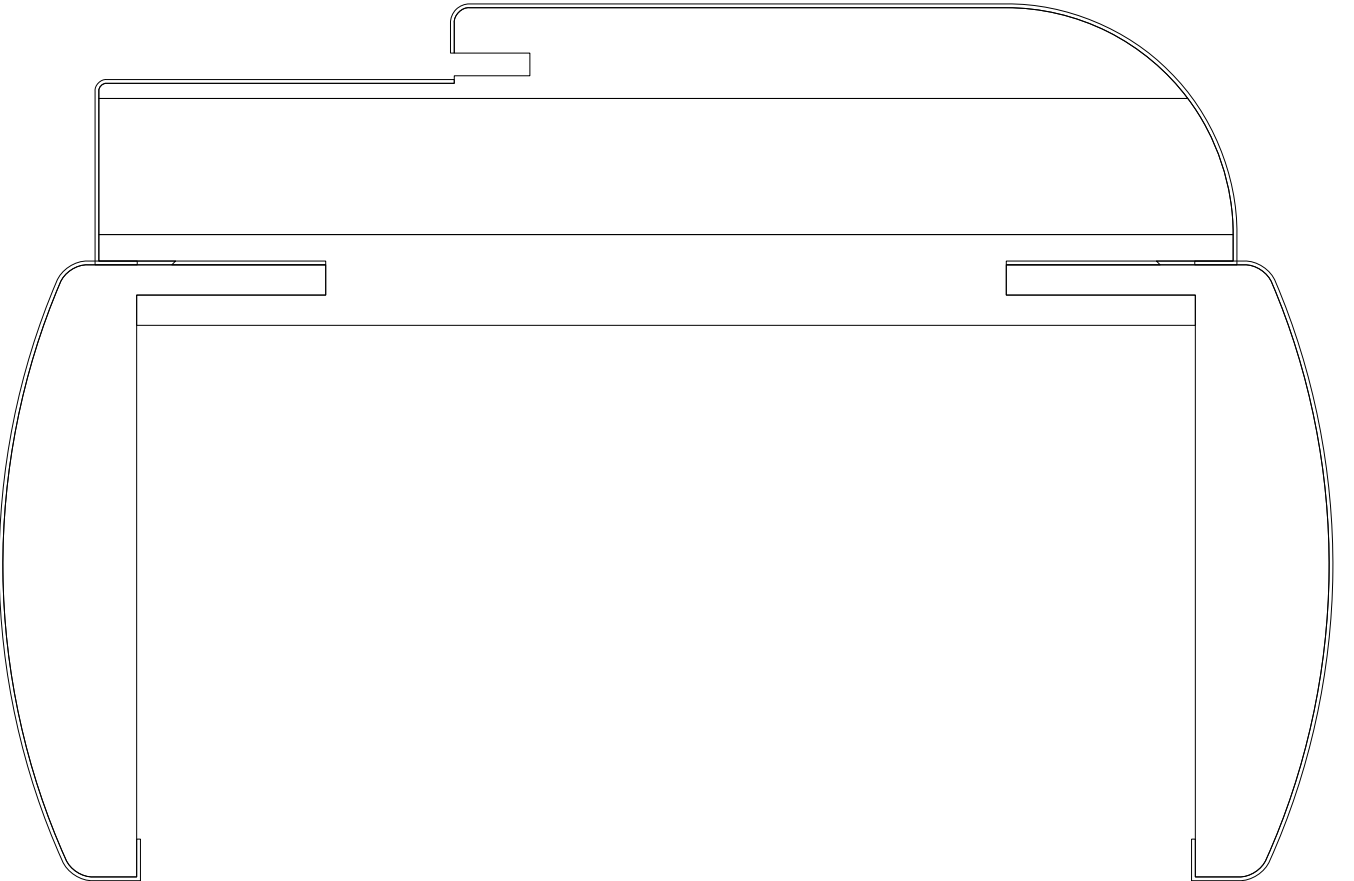

\*\*Kapı kasalarımız, yüksek dayanıklılık ve kalite standartlarına uygun olarak üretilir. Özel olarak seçilmiş 1. Sınıf 12 mm SFC belgeli MDF levhaların arasına, 18 mm kalınlığında 1. sınıf ladin ağacından üretilmiş panel yerleştirilir. Bu katmanlar, ısı ve pres yardımıyla tutkalanarak sağlam bir kompozit panele dönüştürülür. Sonuçta ortaya çıkan kasa panelleri, uzun ömürlü olur ve arasında bulunan ladin ağacı sayesinde vida dayanımı artar ve kapının zamanla sarkmasını engeller
